**Powder Coated Steel**
High-tech quality at an economical price. Themosetting acrylic finish on electrogalvanized/ galvannealed steel is highly resistant to corrosion, grease, acids, caustics, mars and stains. A broad range of contemporary colors to complement any interior. Available in all styles.

**Stainless Steel**
Gleaming beauty indefinitely. The elegance of stainless steel compliments any design scheme. Corrosion resistant and impervious to just about any chemical abuse. Easily maintained, even scratches can be buffed out. Satin or textured finishes available in all styles.

**Plastic Laminate**
Combining design flexibility, aesthetic appeal and economy in an ideal finish - the proven benefits of high pressure laminates are built in - featuring a smooth surface highly resistant to scratches, grease and marks. Offered in a complement of designer colors. Available in all styles.

**Phenolic**
Holds up even in severe moisture conditions from showers, pools and saunas, or when maintenance includes hosing down toilet partitions. Ideal where vandalism is a problem. In a full color spectrum - all with black edges. Available in all styles.

**Polymer**
Polymer is highly resistant to stains, common acids and cleaning agents as well as to moisture. The ideal choice for busy public facilities - never needs painting and will not easily dent or chip. Offered in a wide variety of contemporary colors. Floor Anchored/ Overhead Braced, Ceiling Hung and Floor and Ceiling Anchored styles.

Automated External Defibrillator (AED)

Someone goes into sudden cardiac arrest every two minutes in the United States. In cardiac arrest, the heart’s rhythm becomes erratic and the heart can’t pump oxygenated blood to the brain and other vital organs. The victim collapses. Automated External Defibrillators (AED), a compact, portable battery operated version of the kind used in hospitals, can now be used to deliver measured shocks to reestablish the heart’s normal rhythm.
